

FS CG NZ Hydraulic Oils

FS CG NZ Hydraulic Oils are well suited for use in more environmentally sensitive areas. All oils in this product group are zinc free/ashless and are formulated to meet the current specifications for hydraulic operating systems. This oil provides more than 6,000 hours of protection in most operating environments (hours may vary due to contamination, moisture, temperatures, etc.).

FS CG NZ Hydraulic Oils are popular in large production facilities utilizing central systems for their metalworking fluids. The absence of a zinc package has eliminated the skin sensitivity issues associated with a standard anti-wear package. The NZ products tend to be less disruptive to coolant emulsions and specialty high-speed grinding oils, which further extends and prolongs the life of the metalworking fluid and grinding oils.

ADDED BENEFITS

- Excellent oxidation stability
- Excellent hydrolytic stability.
 - Low Foaming
- Excellent Anti-Wear properties.
- Excellent filtration characteristics
- Color across all viscosity grades: 0.5
 - Very faint smell (light oil)

TYPICAL PROPERTIES

	<u>FS CG 10 NZ</u>	<u>FS CG 15 NZ</u>	<u>FS CG 32 NZ</u>	<u>FS CG 46 NZ</u>	<u>FS CG 68 NZ</u>
ISO VG Grade	10	15	32	46	68
Viscosity 40°C, cSt	10	15	32	46	68
Viscosity 100°C, cSt	1	2	5	6.5	8.5

STORAGE: FS CG NZ Hydraulic Oil products should be stored at room temperatures (between 55 to 95 °F). Keep away from sparks, open flames, and other sources of ignition as product and empty containers could contain combustible, flammable, or ignitable substances. Do not weld or cut empty drums.

HEALTH & SAFETY: Please refer to the Safety Data Sheet (SDS) for additional information.

Warranty: Because conditions of use are beyond our control, no representation or warranty is made in connection with the use of this product. Technical information and recommendations are believed to be accurate but are not guaranteed.
