

FS KW 6000 Line- Product Uses

(KW 6070, KW 6050, KW 6030, KW 6010)

Biodegradable/ Water Based Cleaners

The **FS KW 6000 Line of Biodegradable Cleaners** is formulated to meet the demanding needs of industry, while at the same time adhering to the Green Initiatives push for products that are biodegradable and VOC compliant. Below are some of the typical applications for the cleaners in this line.

NOTE: The cleaners listed meet LVP-VOC exemption per CARB, U.S. VOC exemption for consumer products per EPA 40 CFR 59.203(f)1, EU 1999/13/EC Solvents Emissions Directive.

FS KW 6000 Line of Products

FS KW 6070: 70% Active. This product is best used as an extreme sludge, oil, degreasing, tar removal, and solvent replacement. It is also highly effective for concrete and stain cleaning, and for graffiti removal (including latex paint up to one week and most stains up to 24 hours (pencil, crayon, highlighter, ketchup, permanent marker, mustard, ink, washable marker, lipstick, etc.). Additionally, the ultra concentrate nature of this cleaner allows for its shipping to remote locations, as the product may be cut back with any water source to make cleaners for less demanding applications and to help reduce final product costs. The product may be used straight, or further cut back with water.

FS KW 6050: 50% Active. This product is best used for applications like those listed above, and for applications which require a less concentrate product. The product may be used straight, or cut back further with water to meet the demands of the application. Once again, the product may be reduced further to decrease the costs of shipping.

FS KW 6030: 30% Active. This product is suitable for heavy duty degreasing and machine cleaning, equipment cleaning, and when diluted further with water, for mopping and floor scrubber operations. The product may be used straight, or diluted 10:1 for spray bottles and high pressure steam washers, 30:1 for mopping, and 60:1 for scrubbing applications.

FS KW 6010: 10% Active. This product may be used straight for degreasing operations, adhesives removal, and removing oils and sludge. It is particularly effective in spray bottles for spot cleaning and machine cleaning. For lighter duty cleaning applications, dilute the product 10:1 for spray bottles, 15: 1 for mopping, and 25:1 for floor scrubber applications.

Application Note: As with all cleaners, the product should be tested in an area for compatibility with the surface to be cleaned. Because of the extreme cleanliness characteristics of this product, it is not recommended for the cleaning of automobiles.

Warranty: Because conditions of use are beyond our control no representation or warranty is made in connection with the use of this product. Technical information and recommendations are believed to be accurate but are not guaranteed.
